

# 360° | PROCTOLOGY

NEW!

NAME	REF	PU	Ø Core	Ø Tip [mm]	EMISSION
ETQ 360° HEMOLUX INFINITE 600	SFCS000500	5	600µm	1,8	CONICAL

Length: 2500 mm

#### INDICATIONS:

Hemorrhoids

#### Advantage of SFCS000500 - INFINITE Tip:

The diffused radiation of energy over a 4mm spiral inside the INFINITE tip causes an advanced application of heat to the tissue - which reduces the level of possible necrosis, pain and carbonization at the glass tip compared to the concentrated application of heat when using the "One-Ring" standard fiber. Energy is delivered both axially and circumferentially, forming a uniform cylindrical coagulation zone. By spreading energy across a larger surface area, peak temperatures can be reduced by up to 50%.

#### Advantage of SFCS000500 - ALL-IN-ONE Probe:

The HEMOLUX Infinite Hemorrhoid Probe is designed as a single-piece instrument with a fully integrated, reinforced cannula. Its ready-to-use, all-in-one configuration eliminates the need for assembly, saving valuable operating room time and streamlining clinical workflows. A fixed distance between the cannula and the tip ensures consistent and repeatable energy delivery. The rigid unibody design provides enhanced stability and prevents any movement or slippage of components during the procedure. The unique design of the HEMOLUX Infinite Hemorrhoid Probe is based on our proven INFINITE technology. As a single-component system, the HEMOLUX Infinite Probe simplifies inventory management and helps reduce the overall cost per procedure
